Foreword i
List of Acronyms v

Session I: Coal Combustion By-Products Characterization 1
Leaching Tests: Commonly Used Methods, Examples of Applications to Coal Combustion By-Products, and Needs for the Next Generation
S. Soroni 3

Bulk Chemical and Mineral Characteristics of Coal Combustion By-Products
J. Tishmack 13

Engineering and Regulatory Issues for Coal Combustion By-Products
Characterization and Utilization, D. Hasset 21

Luncheon Remarks
Kathrine L. Henry, Acting Director, Office of Surface Mining, USDI 37

Session II: Site Characterization 41
Coal Combustion By-Products: The Western Perspective
J. Tanner 43

A Summary of Soil Issues Related to Coal Combustion Residues and Surface Mines: Site Characterization for the Mid-Western Perspective
R. Darmody 49

Potential Use of Coal Combustion By-Products (CCB) in the Eastern Coal Region: Site Characteristics
B. Stewart, S. Tyson 53

Session III: Regulatory Requirements 67
Regulation of Coal Ash Placement on Surface Coal Mines in Indiana
M. Sponsler 69

State of Kentucky Requirements for Disposal of Coal Combustion By-Products in Surface Coal Mined Areas
C. Ball 79

Pennsylvania's Regulatory Requirements for Use of Coal Combustion Ash at Coal Mining Operations
N. Strock 83

New Mexico's Regulatory Requirements for the Use of Coal Combustion By-Products
M. Anderson 87

Session IV: Design/Engineering/Planning 89
Assessing the Water Quality Impacts of Fly Ash Structural Fill Projects
J. Bonetti, G. Brendel 91

Design and Management of Coal Combustion By-Product Mine Backhaul Placement Areas
W. Giles 97

Design and Construction Guidelines for Coal Combustion By-Product Utilization in Abandoned Mine Land Settings: A Case Study
D. Bryenton, J. Gasper 105

Session V: Environment: Land and Water 117
Coal Ash Chemical Properties and Potential Influence on Water Quality
V. Evangelou 119

Use of Coal Combustion By-Products for Reclamation: Environmental Implications
B. Paul, S. Chaturvedula, B. Newton 137

Coal Combustion Residues in Soil Amendments: Surface Coal Mining
R. Korcak 143

Public Concerns Regarding the Management of Coal Combustion Wastes
T. Fitzgerald 153

Session VI: Monitoring and Evaluation 159
Coal Combustion By-Products and Contaminant Transport in Groundwater
E. Mehnert, B. Hensel 161

Elements of Computer-Assisted Thermodynamic Chemical Equilibrium Modeling as Applied to Waste Water Treatment in Coal Mines
G. Dreher 173

Instrumentation for Modeling the Vadose Zone of Sites Reclaimed with Coal Combustion By-Products
S. Esling 183

Session VII: Case Studies 199
Coal Combustion Fly-Ash as Construction Materials in a Sanitary Landfill Project
J. Bacher, R. Collins, J. Taylor, M. Miller 201

Fluid Placement of Fixated Scrubber Sludge to Reduce Surface Subsidence and to Abate Acid Mine Drainage in Abandoned
Underground Coal Mines, R. Meier 211

Engineering Design for the Injection of Alkaline CCB's into a Maryland Coal Mine to Abate Acid Mine Drainage
L. Rafalko, D. Mountain, P. Mallon, P. Petzrick, Y. Chugh 221

Use of Wet FGD Material for the Reclamation and AMD Abatement in Abandoned Acidic Coal Refuse Piles
S. Mafi 227

Baker Soil Test® Development and Field Case Studies Provide Theory and Data Showing That Plants Don't Grow in Soils
D. Baker, C. Baker, G. Wommack 235

Leachate Quality from Course Coal Refuse Mixed with Coal Fly Ash: Effects of Ash Blending Rates
B. Stewart, W. Daniels 247

Appendix 1: Additional Papers 257
An Overview of the Western Maryland Coal Combustion By-Products/Acid Mine Drainage Initiative
P. Petzrick 259

A Preliminary Evaluation of the Winding Ridge Demonstration Project
P. Petzrick 265

Appendix 2: Recorded Discussions 269

Appendix 3: Results of Work Groups 293

Appendix 4: List of Forum Attendees 297

Fluid Placement of Fixated Scrubber Sludge to Reduce Surface Subsidence and to Abate Acid Mine Drainage in Abandoned
Underground Coal Mines, R. Meier 211

Engineering Design for the Injection of Alkaline CCB's into a Maryland Coal Mine to Abate Acid Mine Drainage
L. Rafalko, D. Mountain, P. Mallon, P. Petzrick, Y. Chugh 221

Use of Wet FGD Material for the Reclamation and AMD Abatement in Abandoned Acidic Coal Refuse Piles
