

Fish and Wildlife

I have extensive knowledge of Endangered Species Act consultation processes. I can provide liaison duties between State RAs and the U.S. Fish and Wildlife Service for both AML and Regulatory Projects. I am currently a member of the Biological Opinion team developing a new Biological Assessment and Opinion that replaces the current 1996 Biological Opinion. I was a member of the Stream Protection Rule, and although repealed, required learning further knowledge of existing regulations and State concerns with changes to those regulations as they relate to fish and wildlife values.
