

## FRANK MCCOY, SOIL SCIENTIST

---

### **Reforestation**

I can assist in the evaluation of suitability of the Forestry Reclamation Approach (FRA) for reforestation on both active mining sites and AML sites, as a way to improve tree growth and survival on mine sites. I can also assist in identifying possible partnerships and additional funding opportunities to facilitate these efforts on AML sites. OSMRE, working with a non-profit partner, hosts volunteer tree planting events at AML and Legacy mine sites that provide opportunities for community outreach.
